DESIGN BRIEF DOCUMENT

Design Brief Document

Stitch: the visual design direction, so every screen looks consistent and on brand.

1 Overview

This document defines the visual design direction for Stitch: colors, fonts and how each screen should look. It keeps the experience consistent and on brand across every screen, in light mode and dark mode.

2 Brand Identity

A clean, modern and friendly design that feels trustworthy to students and creators.

Clean
One clear action per screen

Friendly
Plain, short language, including chart descriptions

Phone first
Thumb-friendly, built for small screens

Both modes
Works in light and dark mode

3 Color Palette

Light mode (from the app today)

Primary	Secondary	Navy	Ink	Muted	Page
#1E90FF	#4169E1	#0A2540	#0F1F33	#8A94A6	#EEF1F8

Field	Border	White	Success	Warning	Danger
#F4F6FB	#E6EAF3	#FFFFFF	#2FAE5C	#F0A93C	#E0473F

Brand gradient

Dodger Blue #1E90FF → **Royal Blue #4169E1**

Dark mode (kept as it is today)

Near black	Deep grey	Panel grey	Card grey	Line grey	Soft white
#121212	#181818	#1E1E1E	#2B2B2B	#3A3A3A	#F2F2F2

Charts and graphs keep their original colors in both modes.

4 Typography

PRIMARY FONT

Montserrat

Weights 400, 500, 600, 700, 800. Used for headings, body text and usernames.

Aa Bb Cc Dd 0123456789

ALSO IN THE APP

Colmeak (falls back to Montserrat): already used across many panels and menus, and in the chat options panel.

Inter: already used in a few places.

Both stay as they are. Do not add other fonts without the designer's approval.

Style	Size / Weight	Sample
Heading 1	28px / Bold	**Heading 1**
Heading 2	22px / Bold	**Heading 2**
Heading 3	18px / Semi Bold	**Heading 3**
Body	15 to 16px / Regular	Body text
Small	12 to 13px / Regular	Small text

5 UI Components

Primary button

Continue

Back pill (white, no outline)

Back

Input field

Enter your email

Selected and normal pill

Selected Normal

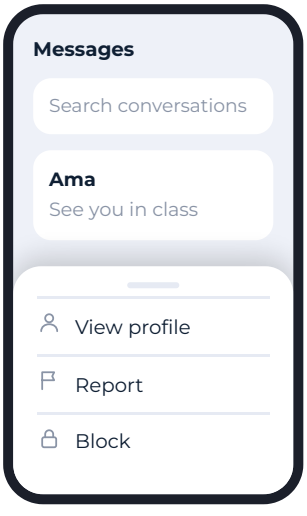

Floating pills at the bottom of a flow

Back Continue

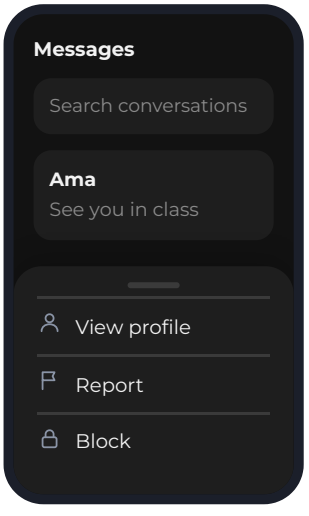

Save pill (does not expand)

Updating

Pull-up menu in light and dark mode

Light

Dark

- Menus pull up from the bottom, never drop down; they slide down slowly when closed by tapping empty space
- Icons on panels are grey only (no red or blue icons)

- Every menu uses the same row style (chat options, glimpse menu, settings)
- Three-dash menu at the top right of every glimpse, with the last dash shorter
- Titles: right-aligned on New post, Posts and My glimpse; centered on Match with CV
- Charts keep their original colors; every analytics page has a plain-language description under each chart

6 Screen Guidelines

Phone first
Desktop adds a side navigation and a right panel

Feed videos
Start with sound, autoplay in view, stop when scrolled past

Loading
Show a skeleton or loader while content loads

Empty and error
Friendly message and a next step; retry button on errors

Motion
Short and smooth; slide up quickly, down slowly; respect reduce motion

Accessibility
Good contrast, thumb-sized targets, text scales with system size

7 Do and Do Not

Do

- Reuse existing components first
- Test every screen in light and dark mode
- Keep language short and friendly

Do not

- Add new fonts or colors without approval
- Use red or blue icons on panels
- Drop a menu down from the top
- Put a panel behind the Back and Continue pills
